

# ANTWERP MEDICAL STUDENTS' CONGRESS

Dear colleague,

On 17 and 18 September 2010 the EMSA (European Medical Students' Association) will organise the 4th edition of the **Antwerp Medical Students' Congress (AMSC)**, this congress is jointly organized with the 65th edition of the annual Antwerp Medical Days; which is this year organized by Prof. Dr. L. Van Gaal with topic obesity.

Presentations of innovative research are the cornerstone of this AMSC, offering researchers the opportunity to disseminate their findings and network with other medical science researchers.

Please share your knowledge, ideas, expertise, innovations, practices, case studies and opinion by answering this call for abstracts for the 2010 AMSC.

You can upload your abstract on our website: [www.amsc.be](http://www.amsc.be) until the deadline of **June 30, 2010**.

All abstracts will be reviewed by the Commission for Scientific Research (Commissie Wetenschappelijk Onderzoek – CWO), which is headed by professors and doctors from our faculty. Accepted abstracts submitted by registered delegates will be published in the Final Programme & Book of Abstracts, which will be distributed to all conference delegates.

The congress is completely free for all participants and visitors. Please note that the Conference Organisers regret that they cannot pay travel expenses. The best oral presentation and the best abstract will each receive an award.

We look forward to receive your abstract and meet you in Antwerp in September 2010!

Visit our website at [www.amsc.be](http://www.amsc.be) for more information.

Niel Merckx  
President AMSC 2010

Prof. Dr. L. Van Gaal  
President Antwerp Medical Days 2010
